

Fuel System Parts Cleaner

(Carb And Choke Cleaner)

Bardahl Fuel System Parts Cleaner cleans dirty carburetors and parts of fuel injection systems in the blink of an eye. It also has all the properties described in the product information of the **Fuel Treatment**. This product removes gum and varnish from the fuel system. It cleans the automatic choke, nozzles, and injection needles. It prevents irregular idling of the engine.

How it works

The aerosol packaging of this product has the great advantage that it is injected with force and sprays and dissolves the deposits, as it were. It also creeps better between the links of all moving parts. Wherever the spray goes, the powerful solvent does its job. It dissolves varnish, gum, and Sludge and ensures a problem-free functioning of the carburetor.

Manual

— **Carburettor**

Spruit het product direct in de luchtinlaat van de carburateur terwijl de motor warm is en met een hoog toerental draait.

— **Links**

Spray the product directly on the links and the dirt is washed away.

— **Automatic choke**

With a spraysprit, Carb and Choke are sprayed directly into the choke.

Operate the choke several times by hand to see if it works properly. Then reassemble the disconnected parts.

Note: Do not spray on lacquer!
