Bardahl Racing Octane Booster

Ref. 13107

12x300 ml

USE

Bardahl Racing Octane Booster is a new concentrated formula which increases the octane rating of gasoline.

When these vehicles use too low an octane fuel, engine "knock" occurs, warning the motorist of lean fuel combustion, loss of power and potential engine damage. Even in vehicles designed to run on lower octane gasoline, overrun and engine "knocking" can occur, due to the build-up of deposits in the combustion chamber. Periodic adjustment of gasoline spark-ignition engines will ensure correct timing of ignition of the spark plug and prevent this cause of engine knocking. Explosion can also result from the use of too low an octane fuel for an engine.

Properties

Bardahl Racing Octane Booster:

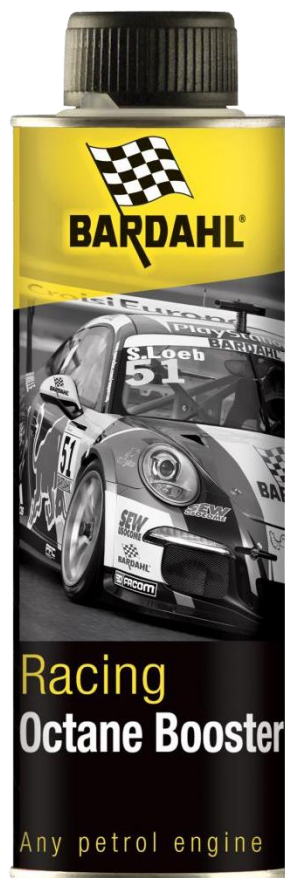

- ✓ Increases gasoline octane rate by several points (depending on the type of fuel used).
- ✓ Ensures A Better Controlled And More Uniform Gasoline Combustion.
- ✓ Reduces knock from pre-ignition and explosion.
- ✓ Inhibits overrun by combustion chamber deposits.

INSTRUCTIONS BEFORE USE

- Add Bardahl Racing Octane Booster to the fuel tank before filling.
- One bottle is good for 40L of petrol.

PHYSICAL & CHEMICAL PROPERTIES

Physical condition	Liquid
Color	Amber
Flash punt	56 °C
Density	0,814 g/cm ³ (15°C)
Viscosity, kinematic	1,5 mm ² /sec (40°C)
Solubility	Insoluble
