

Windshield Cleaner

Bardahl Windshield Cleaner gives you a clear view through the front and rear windows. It is a highly concentrated cleaning agent that is added to the water of the windscreen washer. This windscreen washer fluid ensures clean and clear windscreens and loosens pollution from insects, oil, silicone, and all kinds of other street dirt. No fat film is left behind.

The problem

Even if a windshield has just been washed and looks bright and clean, it can still be dangerously dirty. Try turning it on through the windshield wiper and look at the greasy streaks. Especially with a sudden sun or backlight in the evening, this can lead to dangerous situations.

From now on, **Bardahl Windshield Cleaner** will make your windscreens cleaner and, therefore, safer.

The product comprises ionic and anionic cleaning ingredients, alcohol, and water.

In addition, **Bardahl Windshield Cleaner** protects the windscreen wiper rubber and is harmless to rubber and paint. As a windscreen washer fluid in winter, we recommend **Bardahl Anti Frost**.
