

## Aluminium Wheelpaint

**Bardahl Aluminium Wheelpaint** is a high-quality, quick-drying metallic paint. It ensures that car rims and many other surfaces get a new and well-groomed appearance. Also protects against corrosion and tarnishing by brine in winter.

### Properties

---

- For indoors and outdoors
- Quick drying
- Long service life
- Anti-corrosion

### Manual

---

Remove rust and dirt from the parts to be treated. Cover the non-sprayable surface with paper. Shake the **can of Bardahl Aluminium Wheelpaint** well. Spray at room temperature at a distance of 30-40cm. Spray in thin layers. After use, turn the can and spray until only gas escapes, this cleans the spray head. This spray can is filled with environmentally friendly gas.
